## Work Experience

### Full Stack Software Dev - Aim Edge Apps

June 2023 - Current

- Contributed to building a cutting-edge web platform for transcription orders, addressing both client-side and internal back office needs.
- Managed client relationships, incorporating feedback for optimal results.
- Demonstrated front-end mastery with React.js and Material UI, ensuring visually striking interfaces.
- Showcased back-end expertise using Node.js and MySQL for seamless data management.
- Integrated Square for secure payments and leveraged AWS (S3) for scalable file management.
- Optimized audio capabilities with Otter and AWS transcription service, ffmpeg, ensuring high-quality outputs.
- Streamlined workflows with Zapier, enhancing operational efficiency.
- Implemented Tiny Tech for an intuitive text input editor.
- Orchestrated end-to-end development, delivering a robust platform tailored to transcription needs for high usage.

### Frontend Developer - WebMId

June 2022 - June 2023

- Developed visually appealing and responsive user interfaces using React.js and React Mobile.
- Implemented functionalities with JavaScript, enhancing user experiences.
- Utilized WordPress for efficient content management.
- Improved code quality with TypeScript.
- Optimized performance through code refactoring.
- Collaborated cross-functionally to translate design concepts into web applications.
- Enhanced workflows and version control using Git.

## Education & Soft Skills

### Mechanical Engineer

Universidad del Norte  
2015 - 2020

### Responsive Web Design

freeCodeCamp.org  
2023

### Language

- English: Advanced
- Spanish: Native

### Soft Skills

- Problem solving
- Team work
- Effective communication.
- Attention to detail.
